University of Information Technology & Sciences (UITS)

Faculty of Science and Engineering

Department of Computer Science and Engineering

Program: B.Sc. in CSE

Lab Test 01, Autumn 2026

Course Title: Microprocessors & Microcontrollers Lab

Course Code: CSE0611323

Set A

Marks: 10 **Section: 6A** Time: 1hr

(Answer all questions)

Instructions:

1. Write your codes using standard 8086 Assembly Language (compatible with EMU8086).
2. Add appropriate comments to explain your logic. Marks will be deducted for uncommented code.
3. The output should be according to the sample output. If sample output is not followed then marks will be deducted.

Questions

1. Write an assembly language program that reads two 1-digit numbers (from '1' to '9') from the keyboard. 2

2. Divide the second digit by the first digit and display the quotient and remainder on the next line. 3

3. Perform a shift right (SHR) operation on the multiplication result and print the resulting value in Hexadecimal. 3

4. Print as per sample output 2

SHL in Set B

Sample Output:

Enter first digit: 3
Enter second digit: 8
Quotient = 2
Remainder = 2
After SHR: 01H

Enter first digit: 3
Enter second digit: 8
Quotient= 2
Remainder = 2
After SHR: 01H
